SOCIO-PSYCHOLOGICAL FACTORS OF THE INFLUENCE OF INFORMATION INTELLIGENCE ON HUMAN BEHAVIOR

Vaxabova O'g'ilxon Tolibjonovna

Abstract: In this article, in the process of informatization, the society and the individual the peculiarities of its development, informatization are positive and negative of the process circumstances, information consumption, impact on the worldview and behavior of young people There is talk of constituting social psychological factors.

Keywords: Information, person, psychology, internet, behavior, Socio-psychological factors, developing.

Rapidly developing in all areas of development due to national independence science and technology that meets the requirements of the world templates of the younger generation in our country aware of his innovations, able to think independently, boldly enter life mature, entrepreneurial, spiritually competent, up to date functions are calculated.Today in our country, young people under the age of 18 can be found in the population about 45 percent.It is worth noting that at this age a person consciousness, morality, spiritual image are formed. Therefore, in our country such the focus on youth is enhanced. Society is a set of collaborative activities that are historically composed of people, those who can make him enter into a cultural relationship and make it a continuity make up the composition. Human activities and social relations between them forms the core of the community. These are production, Family, political, legal, moral, religious, aesthetic activities and their corresponding relationships. And the rise of society is in keeping with the spiritually mature, social demands that make it up, to educated persons and the effective activities they carry out, the results of related. Person-a separate individ, a social moral world. It contains the essence of man, embodies his value as a being. Personality socialized mind, mind being able to manage activities through, social, historical tradition, living represent specific generations based on style and experience. The way of life of an individual directly in the life of the community, it is to live in full enjoyment of the benefits of life moves. This process allows people to interact with one another, information assumes the exchange. Information (Latin for "information" - explain, explain do not) one of the main concepts of modern science and politics, originally people by oral they are information transmitted later in writing or in other forms. Information-about people, objects, facts, phenomena, processes, etc. refers to a set of data. Information system-implementation of informative processes it is a complex of extender, regulated documents and information technologies.

The worldview of young people, their behavior and formation as a perfect person from the important social psychological factors that affect the social environment and in this society information is an increase in the demand and need for communicative technologies. From the tools of modern technology in the information age, which is rapidly developing day by day there is no way to avoid or refer to fictions.Because especially in the formation of the worldview, in the further expansion of its spiritual world computer technology plays the role of the main tool.It is pleasing on the one hand status. Today we young people want from such great opportunities using it, we are making much more efficient use of our time during study or work.

In the age of Science Technology, the internet and Social, which is rising rapidly in addition to the positive aspects of networks, its youth spirituality, we also witness the negative impact on the mind, worldview, thirsty for news. Let's pay attention to the cafe inetnet, where the bright young people are

there whether you're watching games in the spirit of all sorts of disruptive ideas, we witness that besamar is spending their time. The saddest thing is that indifferent fathers think that my child is sitting on the internet and gaining knowledge. In this sense, various preserving our lives from spiritual threats, not allowing spiritual emptiness, protect our young people from negative factors that affect their worldview, behavior for, above all, the sharpness that is happening on the world arena through healthy ideas we must be able to compete in a competition of intelligence and talent. Such not only the knowledge of the person entering the competition, but also his moral views should be formed at a high level.

By industry experts in our country published through ongoing social research as well as media judging by the data, the Internet is currently in the psychology of young people as long as it is one of the most fundamental factors in the formation of destructive ideas.

In turn, the Internet is higher in the transmission of information and in the release of rest the fact that it has opportunities is a key factor in attracting young people. Internet ideological propaganda and the acquisition of youth consciousness of external forces social networks are considered an important tool, especially the main ones in this regard are taking over. In particular, social in Uzbekistan today the number of users of networks is increasing day by day. Such among the social networks are Odnoklassniki, Facebook, Vkontakte, Twitter others can be entered. According to data, social in the country users of the network received 10 million rubles.in excess of, their dailyaudience 3,5 mln.ni organizes (the main part of them is young people). 2017 in the year, the daily audience of users of networks increased by 30 percent. Daily audience of Odnoklassniki network alone the global audience is 1.5 million. the registrants received Rs.more than, And Facebook users 280 in early October 2017 thousand.over. Of these, 64% are male and 36% are female. Negative on the side, from social networks to various acquaintances and conversations in addition, lies and one-sided thoughts, various shameless videos too can be observed. According to data, the impact on personality psychology on the internet network there are about 9 thousand sites that encourage you to make suisid 100 in a month mln.Dan is visiting orthif. Also 12% of total websites pornographic character acquires. Most of the filtering applications today the high efficiency factor is 90 percent. This condition is known as "death Games " ("blue whale", "sea of whales", "quiet house", "Wake Me Up at 4:20", " salt andice"," f57"," rich Uzbek girl", etc.) of the games known as Creates conditions for spread over the Internet. 720 worldwide in 2016 The children committed suicide as a result of playing these games in 2017 this figure was 815. Information the threat of agaki to such a universal character, its serious impact on all spheres there is an opportunity to do: to the worldview of the individual, to the stability of society, to the peace of the state, to distract public opinion and ultimately lead to the moral of each country, also to the political economic, cultural rise. Because the Society of information, the organization, the penetration into the mind of the family, the individual, is less conspicuous. To distinguish between positive and negative information, to assimilate good information and to reject harmful, a person his consciousness is developed, and he himself needs to be strong-willed.
