**Abstract.** In this article, the fact that the market economy is a universal economy, the diversity and equality of property, the struggle for competition, the freedom of economic activity, the way of life, the standard of living of each person, first of all depends on his income, the increase of labor productivity during the development of the human society. analyzed various ways of attracting people to work.

**Keywords:** freedom of economic activity, market economy, competitive struggle, socio-economic, universal economy, economic relations, individual society of labor productivity.

As society consists of people, each of them has their own personal life, life goals and dreams. Because everyone lives in society, the realization of these dreams and goals takes place through society. Conclusion As a result each one person's destiny society and in it dominant socio-economic system with dependent will be Each one a person prosperous to live , people between reputation - attention to win , moreover from himself after to leave a name in history strives

Research psychologists according to of humanity is the main part prosperous to live for movement does it is Marriage prosperous to be for various districts blessings in abundance to be need Such abundance high level work productivity provides . Humanity society own development during work product increase for a person to labor attraction of doing different ways used them mainly into 3 groups to be can :

- a) to labor forced to do
- b) to labor economic encourage ;
- c) to work spiritual encourage .

These are methods together using the bride , but historical development stages , different socio-economic in systems their ratio differently was

Man in his mind each always own work activities appraiser psychological process happen being stands He is himself of work the result to be evaluated and awarded always analysis is enough If you work eachd from being awarded mind incomplete it 's disappointing pir will work hand doesn't go Each one of a person work to do and work worthy to be awarded society in development important role plays . In this market tasks are also important importance occupation is enough Market duties the following in the table link we reached

Human ceachacter right coming to labor attraction to do the most ok to labor economic encourage it is This method superior level market economy only under conditions wide to apply chance is created . of property diversity and equality , competition struggle , economic activity freedom of this for basis creates One of a person life style , lifestyle level , most first of all his found to income depends .

In general when income to get two way available :

1. Labor in return

## 2. Ownership in return

Labor in return removable income labor economic encourage with depend Labor in return income to find present is the main thing at the moment in place stands Market economy conditions each one a person own mind , intelligence , potential , skills , interest , experience looking wanted work activity with engage in possible have Humanity society development history of the market economy universal economy that showed . Because the market economy society of members main purpose prosperous life to forgive done increase for necessity Create with another economic from systems superior stands His the most important advantage each one person work product increase for encourages . " Only organized market only today's in the day of the people creative and work opportunities open give takes care of stop gives initiative and entrepreneurship develop takes , to encourage and lost mastery feeling again restores »

1. Market in the economy income from sources one property is considered Property owners own properties income to find in order to when using it, it is its own in turn from property carefully to use , efficient options found to use encourages . Market of the economy advantages one resources efficient distribution is to provide .

Market economy limited resources distribution and in use to the exchange based on since , the most first of all necessary commodity and services work release high level efficient to be provides . Strong competition struggle conditions each one economic activity host own position save to stay movement does Work producers while such in the circumstances possible as long as more movement they do Of this main way work release expenses is to decrease . Only market only economical economy of keeping strong reasonable aspects creates costs reduces , robbery and to laziness against will fight

2. Expenses to decrease while work productivity increase , science and technology news work to issue current to do through is achieved . Each one work of the issuer resources to save the pursuit of them efficient distribution provides . Changing to the circumstances high as fast as possible flexibility is also the market superiority is considered Market mechanism high level efficient way necessary goods work release and service to show to the road puts Because society on demand suitable was not goods realization will not be done . As a result his owners spent expenses cover they don't get it , damage they like it . That's it risk each one work the issuer in the market on demand quickly to adapt forced does As a result mother that's it work release composition and volume Demand based on is formed and to him according to resources are also distributed . " Only market only work release of the consumer interests submission to the product has been demand sure account get , conjuncture changes looking at speed the work catch opportunity gives »

3. Science and technology achievements maximum level use to innovation inclination market of the economy another one is an advantage . Competition struggle As a result bankruptcy not to be , not to break for each one work issuer and service pointer to others relatively less cost to do , better quality product work to release , new kind of goods work release and service to show strives For these purposes in reaching main the role of science and technology news plays . That's why for market mechanism news search , inventions make them work to issue current to do constant action doer stimulus creates " Only market only sensitive to news does , science and of technique the most last achievements bold and zeal with current enough , own of work to his master , his profession worthy price gives ".

4. Market economy various districts needs satisfy commodity and services quality improve opportunity width separate with stands Market economy above and another in chapters counting passed signs goods and services overflow surface brings This is it in turn buyers choose get opportunity expands . Market of the economy another in chapters as well seen positive sides of the economy fast development provides . Him universal to the economy turns

Market economy no doubt advantage yes, but him each how shortcoming and of contradictions still consider it an ideal mechanism error , market economy objectively from assessment far away His to himself special disadvantages , weak sides available :

1. Market economy again non-recoverable resources preserve nature protection do , the environment Demand level save, ecological balance to provide surface does not issue .
2. Work with and prices level stability does not guarantee .
3. Fundamental research in science take to go opportunity is limited . Quickly benefit which does not bring , but knowledge , future for important was research , theoretical research not encouraged.
4. Unprofitable or eachm which brings , society for necessary was , but spent expenses quickly not covered , large funds Demand team that does together which uses commodity and services work release not encouraged .
5. Population stratification to increase take will come
6. Price parity (scissors) industry in favor of solution will be

High developed market in the economy mother that's it shortcomings restriction for state by measures is determined. Market economy and market of relations great power that is, those people work activity activity continuously way provides. There is of resources carefully to use, innovation to aspire , each one to work hand from hitting first result how to be thorough to think , rationally to risk encourages . As a result his the most main advantage of the market fullness Unable to provide will be
